Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 07 July 2004.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-20 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sugiura et al (US. 5,707,066) in view of Woods (US. 5,228,876).

Sugiura discloses a joint assembly (as showed in figure 1) for use on a vehicle, the joint assembly having a shaft (shaft 42), a first joint part (part connected to the shaft 42) connected to the shaft, a second joint part (second joint part 41 distal from the 42) cooperable with the first joint to transmit torque there between, a cage (cage holding bearing balls 45) arranged between the first and second joint part and a plurality of balls arranged between the first joint part and the second joint part. The joint assembly having a rubber boot (boot as seen in figure 2) having a first end and a second end (first end that contacts shaft surface 21 and second end where 6 is) associated with the second joint part (the second end is associated to the second part 41). The joint assembly comprising a boot cover (9) having a first end and a second end (first end 20 and second end connected to the second end of the rubber boot), the first end of the boot cover affixable to the second joint part (where 20 is connected to 41) and the second end of the boot cover affixable to the second end of the boot (the second end of the cover is connected to the second end of the rubber boot). The boot is formed of rubber or thermoplastic material.

Art Unit: 3676

Sugiura discloses the invention substantially as claimed above but fails to disclose at least one end of the boot ends is internally reinforced with a high stiffness and high strength fabric material. Woods discloses a boot that is entirely formed by a rubber that is reinforced by fabric, the reinforced material is arranged between layers of body material (silicone as showed in figure 3) and the reinforced material is encapsulated with the body material that is flexible. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have the boot of Sugiura to be formed by a rubber reinforced fabric material as taught by Woods, to provide mechanical strength (column 1, lines 55-57 of Woods).

Response to Arguments

3. Applicant's arguments with respect to claims 1-20 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 3676

however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
